Control Stick Function

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows subtle control that is not possible using the conventional ✚ Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding the L and R Buttons.

The Control Stick is a precision instrument - make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center℠.

Holding the Nintendo 64 Controller

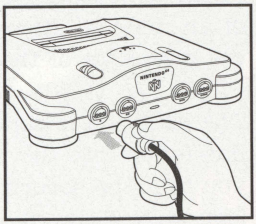

While Playing the GoldenEye game, we recommend you use the hand positions shown at left. By holding the controller like this, you can operate the Control Stick freely with your left thumb. Using your right thumb, you can easily access the A, B or C Buttons. Place your left index finger on the Z Button on the back of the controller.

Connecting the Nintendo 64 Controller

Up to four players can play this game. Connect each player's controller to the appropriate controller socket on the front of the Control Deck. Beginning on the left, the sockets are for Player 1, Player 2, Player 3 and Player 4. You cannot start the game if the first controller socket is empty.

If you change the connection during the game, you will need to either press RESET or turn the power OFF to make the connection active.

You must use two, three or four controllers in order to play the 2-, 3- or 4-Player game modes.

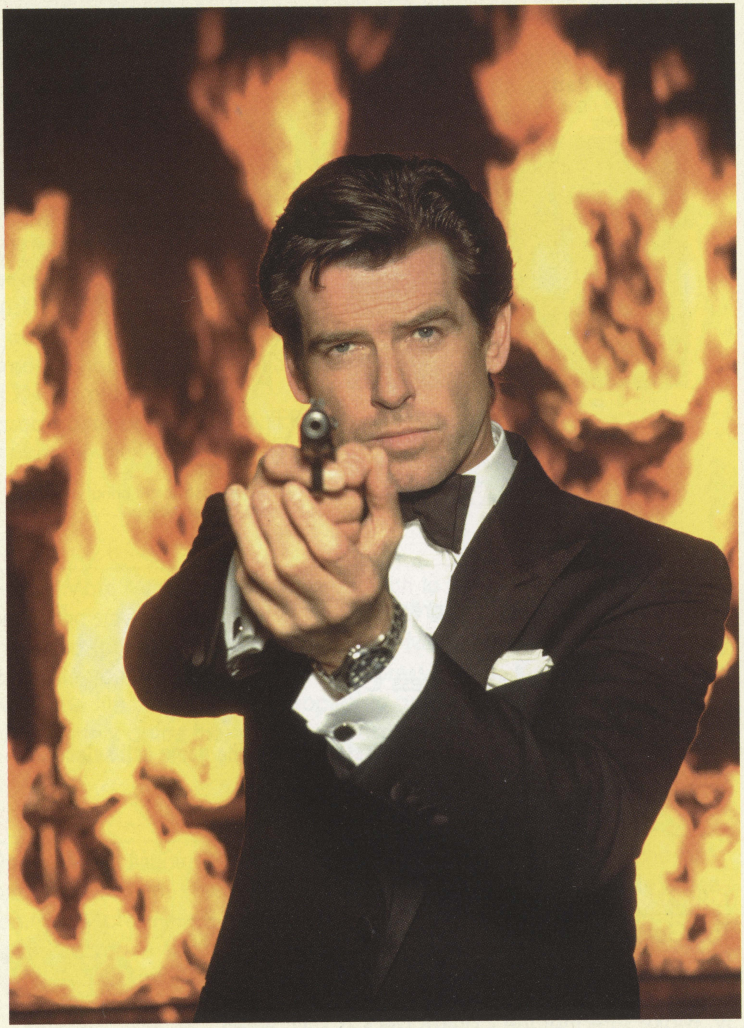

All right, 007, it's time to get down to business. Some time ago, Pirate, a top-secret combat helicopter, was hijacked from a French war vessel in Monte Carlo. Pirate was stolen by Xenia Onatopp. She was assisted by several mysterious comrades.

Xenia, a former Soviet pilot, is a known accomplice of the Janus Syndicate, an international organization that is world renowned for its dealings in top-flight illegal arms. They are currently based in St. Petersburg, Russia.

Pirate reappeared two days ago in Russia near the site of an unusual disturbance believed to be the result of the discharge of the GoldenEye weapon satellite.

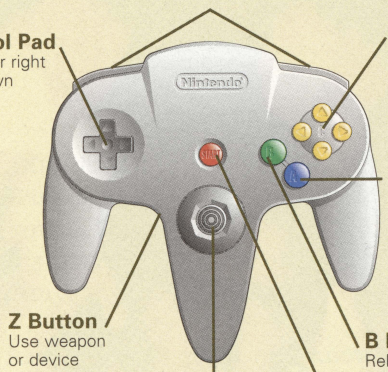

The situation is serious, 007. If Pirate or GoldenEye has fallen into the wrong hands, I don't have to tell you that the security of the free world could be in jeopardy. We want you to recover the Pirate helicopter and get to the bottom of this. You are licensed to kill.

Watch Magnet	A miniature electromagnet. Only a few uses before charge is drained completely.

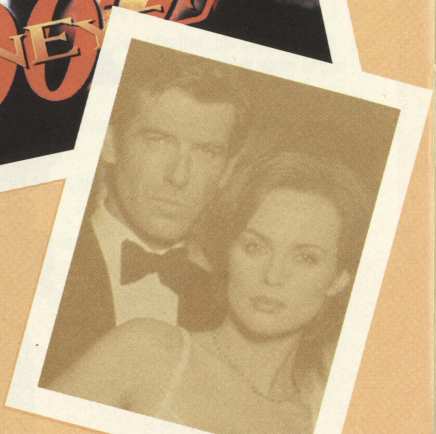

GAME OVER

Too many hits from unfriendly fire could prove fatal. It will also mean game over. If this happens, you will return to the Background screen where you will have another crack at the mission. Make sure to pick up the body armor. While the body armor won't make you invincible, it could give you the protection you need to complete a mission.

FRIENDS, ENEMIES AND VILLAINS

CHARACTERS

There are many different characters available. Can you find them all?

WEAPONS

Choose from an assortment of weapons.

HEALTH

To make the game more even, adjust the health level of one or all four players. Veteran players can select a lower health level to make the game more interesting. Novice players should select a higher health level.

TIPS FOR SUCCESS

- Some weapons that normally fire a short burst of bullets will fire a single shot when using the aim. The single shot will be more accurate than a burst because the weapon's recoil spoils your aim when you fire continuously.
- Throwing knives can be thrown more quickly if you prepare yourself.
- Some of the high-power weapons are able to shoot through objects including doors.
- Leaning is ideal when under heavy fire. Stand behind a corner or column, then lean out left or right and fire off a few rounds.
